

KINECTRICS INC.

IDEAS INTO ENERGY

Kinectrics Inc., a member of the *AEA Technology Group*, is a leading science and technology support services company. Formerly Ontario Power Technologies (the technical services and consultancy division within Ontario Hydro), Kinectrics has over 85 years experience in servicing the needs of one of the world's major electric utilities and also the needs of other corporations. Our team of scientists and engineers is recognized worldwide for outstanding technical excellence in the energy sector.

Our services and expertise

Kinectrics' specialists in generation (hydro, fossil, nuclear), transmission, distribution, industrial energy services, and environmental technologies use innovative science and engineering to help clients improve business performance. We offer comprehensive services worldwide, in a broad range of technical disciplines across the energy sector. Kinectrics' services comprise five main categories:

Generation and Transmission and Distribution (T&D) Asset Optimization

Energy Management, Utilization and On-site Generation

Environmental Technologies

Field and Technical Support

Product Development and Evaluation

Kinectrics has outstanding credentials in various aspects of radioactive and hazardous waste management and in a broad range of Environmental services. Services in these areas are offered through our Environmental Technologies Department. The department offers planning, modeling, testing and hands-on services to help reduce the cost and risk associated with waste reduction, emissions and disposal. These services are backed by our state of the art Analytical Chemistry and Radioactive Laboratories.

When needed, Kinectrics can utilise the capabilities of other members of the AEA Technology Group to solve customer problems. Also, where appropriate, we partner with external groups to assemble the required skill sets to address project needs.

Project Management, a core competency at Kinectrics, is based on best practices drawn from the Project Management Institute (PMI), from other industries and companies, and from our past successes.

We operate under an ISO 9001 quality management system and offer customized consultation services to meet client needs.
