

NUCLEAR WASTE MANAGEMENT ORGANIZATION
SOCIÉTÉ DE GESTION DES DÉCHETS NUCLÉAIRES

The **Nuclear Waste Management Organization (NWMO)** is responsible for the safe, long-term management of used nuclear fuel in Canada. The approach it is implementing, known as Adaptive Phased Management (APM), involves developing a centralized underground repository, supported by a robust social and technical research program in collaboration with Canadian universities, consultants and international waste management organizations.

Join our growing team of scientists, engineers and other professionals to work collaboratively with Canadians in implementing our management approach in a manner that safeguards people and respects the environment, now and in the future.

INFORMATION TECHNOLOGY ANALYST

Reporting to the Information Technology Manager, we are currently seeking an Information Technology Analyst for our Toronto headquarters who will work with our IT service team to support our Toronto and site offices. We are in search of an Information Technology Analyst with experience in ERP application, methods, systems analysis and design, data management, work simplification, computer programming activities, computer operations and related matters.

Qualifications:

- Completion of a 4-year university education in computer science or equivalent.
- Ideally you will have 4 – 6 years' experience and specialized expertise in information technology and applications.
- Experience in Microsoft Dynamic GP 2013, Siemens TeamCenter, Microsoft Dynamic CRM 2015 applications, Microsoft 2012/2016 server and Microsoft SQL server 2012/2016, and VMware 6.X will be a definite asset.
- Demonstrated success in performing information technology and application product acquisition activities and carry out design, development and implementation activities for systems or databases.
- Ability to maintain systems, applications, products, databases and library files.
- Ability to prepare written reports and prepare and sign correspondence dealing with technical issues.
- Requires good communication and analytical skills to support applications users.
- Ability to conduct studies to assist users in defining and documenting functional requirements, data requirements, and operational constraints related to potential in information-technology solutions for simple problems.
- Ability to provide consultative services and specialized expertise in information technology applications. Assist and provide guidance to users in the availability and use of information technology. Maintain systems, applications, products or databases and library files.

You must be eligible to work in Canada and must be able to meet security clearance requirements. We offer competitive base salaries and a comprehensive pension and health care benefits package.

The NWMO supports the principles and practices of diversity and is committed to providing a respectful, accessible, and inclusive environment for all persons with disabilities and in a manner that takes into account the person's disability and embodies the principles of integration and equal opportunity. The NWMO will provide accommodation to applicants with disabilities. If you require accommodation, please **Contact Us**.
