

**Nuclear Waste Management Organization  
Implementing Adaptive Phased Management 2008 to 2012**

First, the draft Plan is built around objectives in seven key areas.

**Have we identified the right objectives? Have we missed key areas?**

*No. Your main objective should be to bring the problem of nuclear waste to a close by advocating publicly the phaseout of nuclear power*

Second, the draft Plan identifies work and activities we propose to undertake to accomplish these objectives.

**Have we set out appropriate activities?**

*No. The most important activity should be to continue the dialogue with those who oppose nuclear power so that you can understand the seriousness of the situation*

**Third, what more would you like to know about the NWMO's draft Implementation Plan?**

*The Plan is only conjecture until you designate a site. Then all the hazards of dealing with the world's most dangerous and long-lived problem will come to light.*

**Please provide us with any comments on our draft transparency policy.**

*The proposal has always been transparent. The nuclear addicted Board of Directors made the eventual "solution" obvious from the start. Get a different Board with epidemiologists and cancer specialists.*

The holy mountains of the Aboriginal peoples were mountains containing uranium ore. The people knew that these were never to be touched.
