**Implementing Adaptive Phased Management 2011 to 2015**

DRAFT FOR PUBLIC REVIEW

1. The draft Plan is built around seven strategic objectives. Are the objectives that we have identified appropriate? Have we missed key areas?

would new knowledge include an above ground bunker instead of transporting 2000 km. on the existing ~~existing~~ Area. improve

2. The draft Plan identifies work and activities we propose to undertake to accomplish these objectives. Have we set out appropriate activities?

it seems your doing a fine job. all of you thanks for being above board... :)

3. The draft Plan is intended to anticipate the challenges ahead and plan for them. Over the next five years, what are the key challenges that will need to be addressed?

if you do transport, what type of fleet will you be needing to use; specialty units how long will it take to outfit a fleet, train drivers, hire extra security so on.

4. What will the NWMO need to put in place to respond to these challenges?

leave it to the fleet owner or purchase them yourselves... make sure you have someone with transportation experience for this purpose Nuclear powered trucks...

5. Other comments, questions or suggestions?

with modern materials, it may be cheaper to build and above ground bunker. in long term. ???
