**Nuclear Waste Management Organization  
Interview Schedule  
National Sample & Nuclear Community Over-Sample  
April-May 2003**

---

Hello, I'm calling on behalf of Decima Research. We are conducting a survey concerning social issues relevant to Canadians.

Are you a Canadian citizen at least 18 years of age or older who normally lives at this residence?

Participation in this survey is CONFIDENTIAL. Your telephone number will not be given to anyone and your answers will be combined with those of others and never be disclosed.

First I would like to ask you a couple of questions to see if you qualify for this study.

Have I reached you at your home?

Please tell me if you or any member of your immediate family works in:

Media  
Advertising or communications  
Market Research

**[IF YES TO ANY, THANK AND TERMINATE]**

Q1-3: What is the most important issue facing your local community today, in other words, the one that concerns you personally the most? (PROBE: And what exactly do you mean by that?)

		REGION						National Total	Nuclear Over-sample Total

N = 1901 for National Sample; N = 750 for Nuclear Over-sample

I would like to begin by reading you a list of issues that some people in Canada have said concern them. Please tell me how important each of these issues is to you personally by using a scale from 0 to 10, where 0 means "not at all important" and 10 means it is "extremely important". Here is the first one: (ROTATE ITEMS)

Q4: The health care system.

	REGION						National Total	Nuclear Over-sample Total

N = 1901 for National Sample; N = 750 for Nuclear Over-sample

In fact, used nuclear fuel has to be isolated from humans for at least many thousands of years before it is no longer hazardous.

Q16: Have you read, seen or heard anything recently about a new organization created by the federal government to examine the used nuclear fuel issue and make recommendations on how to manage this nuclear waste in the future?

N = 1901 for National Sample; N = 750 for Nuclear Over-sample

In fact, the federal government recently passed a law to create the Nuclear Waste Management Organization, also known by its initials as the NWMO.

I am going to read you a brief statement about the mandate of the NWMO.

The NWMO is a new organization created in the fall of 2002 to recommend a long-term approach for managing used nuclear fuel produced by Canada's electricity generators. While nuclear waste in Canada is currently being safely managed, no permanent long-term management solution has been adopted. The first job of the NWMO is to recommend a plan to the government of Canada for the management of this used nuclear fuel. The legislation requires that the NWMO complete that plan within 3 years. In developing this plan, the NWMO is required to consult stakeholders, experts and the general public as it develops a comprehensive, integrated and economically sound approach for Canada.

Q20: Do you strongly support, somewhat support, somewhat oppose or strongly oppose the mandate of the Nuclear Waste Management Organization?

	REGION							National Total	Nuclear Over-sample Total
	Other Atlantic	New Brunswick	Quebec	Ontario	Prairies	Western

I am going to read you a short list of groups that the NWMO could involve as part of its process of examining various options for managing used nuclear fuel. Please tell me how important you feel it is to involve each of the following groups in this process. How about (READ GROUP)? (PROMPT – do you think it is extremely important, very important, somewhat important, not very important or not important at all to involve that group?)

Q42: The general public.

As the NWMO develops a plan for the management of used nuclear fuel it will be seeking the participation of interested Canadians. If you personally were to participate in the discussion and development of this plan, how likely would you be to do each of the following? For each option please indicate whether you would be (READ LIST) to do that. How about (READ ACTION)?
