Implementing Adaptive Phased Management 2016 to 2020

DRAFT FOR PUBLIC REVIEW

1. The Draft Plan is built around eight strategic objectives. Are the objectives that we have identified appropriate? Have we missed key areas?

Page 16 please: "size and location (of the repository site) will be determined in collaboration with the community ..."; will it be submitted for public comments?

2. The Draft Plan identifies work and activities we propose to undertake to accomplish these objectives. Have we set out appropriate activities?

Apparently yes. But as work progresses, other activities may appear perhaps - keep an "open door" for additional activities if necessary.

3. The Draft Plan is intended to anticipate the challenges ahead and plan for them. Over the next five years, what are the key challenges that will need to be addressed?

Will the site be built in such rocks as to prevent any possible corrosion and subsequent leakage of radioactivity into ground waters?

4. What will the NWMO need to put in place to respond to these challenges?

5. Other comments, questions or suggestions?

When will NWMO consult with the National Nuclear Safety Commission? Will results of the consultation made public? Submitted for comments?

Thanks
